

CLEAN WATER IS NOT ONLY IMPORTANT TO HUMANS,
IT'S ALSO PART OF THE LARGER ECOSYSTEM.

At 'PLANETSWATER' we strive not only to make pristine, healthy water accessible and affordable to everybody throughout the globe, we also aim and strive to make it sustainable. Therefore the more 'self-sufficient' we make achieving pure clean water, the more sustainable it can be. To that end, we are making it our mission to not only provide the perfect renewable water solution, but also smart, eco-friendly ways in providing the power required to make that water so as to create the perfect solution to all our water needs whether that need may be in a dependable remote location or as part of an environmentally friendly 'green energy' alternative regardless of location.... 'PLANETS-ENERGY'

Along with our pioneering advances in Atmospheric Water Generation (AWG) we have also invested both time and money in the processes that make it possible: Energy.

SOLAR

WORLD'S 1ST 'SOLAR POWERED' AWG UNIT

PLANETSWATER PWG-30L + SOLAR PANEL KIT **\$4,995.00**

2000 Watt Peak Solar Kit – Panels, Controller 40A/24V, Inverter, Cabinet, Cables. 1 x 300 Watt Solar Panel (1x27KG)

This 'PLANETS-ENERGY' Solar Panel Kit will allow the PWG-30L to generate between 1-3 Gallons Water/day depending on humidity and sun conditions.
